

Facts

- Up to 200 weighings per minute in combination mode
- Up to 240 weighings per minute in dosing mode
- Portion weights for individual dump: up to 5.000g
- Higher weights in large portion or multiple dump mode are possible
- Maximum accuracy
- Fully automatic calibration and taring
- Product-specific equipment
- Dust and water-repellent design
- Combining, mixing, counting and dosing applications

PRODUCTION PROVEN BENEFITS

reliable + accurate ...

Maximum accuracy and up time are guaranteed by high resolution, temperature compensated weigh cells with integrated calibration weights from our own manufacture. These are automatically calibrated at preprogrammed intervals during operation.

... less giveaway

flexible operating system ...

A windows-based operating system and standardized interfaces enable easy integration into the production process.

... seamless integration into the production process

custom-made + user-friendly + versatile ...

All product contact parts are available in a number of materials such as profiled or smooth plastic or metal to handle different product types. These are interchangeable and can be removed quickly and easily without tools for cleaning, changing products and maintenance. Control and operation of the weigher is via a user-friendly touch screen HMI (Human Machine Interface).

The 'intelligent' automatic feed control eliminates the need for adjustment by an operator for product condition change. Each radial feeder is automatically optimized to achieve the highest weighing efficiency based on
